

zeagle®

— 2010 PRODUCT GUIDE —

Just over thirty years ago, a small American company building custom parachute equipment turned its focus to diving. It seems like yesterday to some of us who watched this small company grow to an industry leader in innovation. Zeagle is unique in an era when many of the most prominent names in diving equipment are distributors, not manufacturers. Zeagle makes things. Skilled people take raw materials and craft them into finished products.

In the eighties, Zeagle patented the Ripcord Weight System which established weight integration as an industry standard. In the nineties, Zeagle patented the PFS™ (Personal Fit System) offering superior fit and comfort for BCs. They produced the first Tech™ BC for use in the new arena called technical diving. It was followed by the now legendary design known as the Ranger™. These two products revolutionized an industry to heavy-duty professional style products using stainless steel hardware and ballistic materials.

But what of the last ten years...

Recently, Zeagle built a premiere regulator design offering the highest performance products for every diving environment. The company expanded its operations to add a California facility, acquired one of the most dynamic thermal protection companies in diving today and now offers the Pinnacle line of products throughout the world with the patented Merino™ Wool lining. Zeagle offers over two dozen thermal protection products, twenty-two BC designs, eight regulators, and just about everything else a diver could ask for.

Now, once again, Zeagle is taking a lead role in the creation of a radical new concept in BC design. The new exclusive **Wicked** product line will be in select stores by early 2010. In addition, diver training will be enhanced through Zeagle's new **DiverzED** product line. Students, for the first time, can learn to dive with high quality newer gear and even demo hi-performance models for their buying consideration. Zeagle offers trade-ins to educators for seasoned rentals and will continue this to **DiverzED** training facilities.

Zeagle still builds products the old fashion way with attention to detail and a customer support team which is unsurpassed. Zeagle has always stood behind every product they make against workmanship and defects in materials. If a product does not perform as it should, they will replace or repair it to the original owner.

***We hope you will consider the Zeagle brand for your diving adventure.
For those of us who have, the ride continues...***

DiverzED™

Are You Ready?

PERSONAL FIT SYSTEM (PFS)

The patented Personal Fit System (PFS) gives the diver an exact fit. The PFS provides superior comfort and is found in most of Zeagle BCs. It is a system of modular, interchangeable components that allow custom tailoring to fit your style of diving and body size.

Personal Fit System

MADE IN AMERICA CUSTOM BC'S

Custom BCs can be made in our factory in Zephyrhills FL
Custom Styles, Colors, Sizing, and Features

RIPCORD WEIGHT SYSTEM

Zeagle's Ripcord™ Weight System - the easiest to use, most secure, and reliable weight system available
Designed after proven release systems used on skydiving equipment
Instantly releases weight on both sides with a unique single pull handle for added safety
Simple zippered opening pockets are easy to load and unload
More secure – no more accidentally dropped weight belts or costly “pull out” weight pockets
Easily accommodates block or bag weights
Never lose part of your BC as with other brands

NEW! Bx SYSTEM

Included on all BCs with Bx Power Inflator or Octo-Z
The Bx Coupler connects to most garden hose fittings for flushing of BC bladder
Each Octo-Z unit includes the Oral Inflator
Oral inflator converts use of BC to a simple inflation vest
Oral inflator is used for extended storage of your BC
All items may be purchased separately

FULL FEATURED BC'S

RANGER LTD 7909RK

Available in Smoke Gray or Black
 36 lb Ripcord weight system with two 18 lb weight pouches
 20 lb releasable rear weight system
 44 lb lift bladder
 Single or twin cylinder capability
 Built in lumbar pad
 Super Duty Airloc buckles
 Shoulder design allows the easy addition of D-rings and accessories
 Zip mount accessory platform on each side of bladder
 8 stainless steel D-rings
 Tuck-away mesh pouch on front of waist panel
 Right-hand shoulder dump
 Adjustable sternum strap
 Integrated utility pockets
 Incorporates PFS

STILETTO LTD 7109RK

Available in Smoke Gray or Black
 24 lb Ripcord weight system with two 12 lb weight pouches
 20 lb releasable rear weight system
 35 lb lift bladder
 Built in lumbar pad
 Super Duty Airloc buckles
 Shoulder design allows the easy addition of D-rings and accessories
 Zip mount accessory platform on each side of bladder
 7 stainless steel D-rings
 Tuck-away mesh pouch on front of waist panel
 Right-hand shoulder dump
 Adjustable sternum strap
 Integrated utility pockets
 Incorporates PFS

ULTRA PERFORMANCE REGULATORS

Best matched with the
Z Octopus 320-8110

FLATHEAD LT

350-8210 Yoke, 350-8221 DIN
 Lightweight, high strength forged 1st stage
 Fully balanced diaphragm 1st stage with 5 LP and 2 HP Ports
 Upgradable to a Flathead-7 model
 Ultra light, low profile balanced 2nd stage
 Diver adjustable venturi & inhalation effort
 Miflex hi flow, flexible, abrasion resistant, low pressure hose
 Sleek compact high tech look
 Excellent choice for travelers
 For discriminating divers who want the best

Best matched with the
Z Octopus 320-8110

FLATHEAD 7

350-8110 Yoke, 350-8121 DIN
 Dry-sealed 1st stage for extreme conditions
 Lightweight, high strength forged 1st stage
 Fully balanced diaphragm 1st stage with 5 LP and 2 HP Port
 Ultra light, low profile balanced 2nd stage
 Diver adjustable venturi & inhalation effort
 Ultra efficient 2nd stage heat sink for superior cold water performance
 Miflex hi-flow, flexible, abrasion resistant, low pressure hose
 Sleek, compact, high-tech look
 Excellent choice for all conditions
 For discriminating divers who want the best

Best matched with the
Envoy Octopus 320-3110

ENVOY DELUXE

350-5110 Yoke, 350-5121 DIN
 Fully balanced diaphragm 1st stage with 5 LP and 2 HP Ports
 Balanced 2nd stage with diver adjustable venturi control
 Diver adjustable inhalation effort
 Outstanding performance
 Upgradable to DS-V model

Best matched with the
CW Octopus 320-5010

DS-V

350-4110 Yoke, 350-4121 DIN
 Dry-sealed 1st stage for extreme conditions
 Fully balanced diaphragm 1st stage with 5 LP and 2 HP Ports
 Balanced 2nd stage with diver adjustable venturi control
 Diver adjustable inhalation effort
 2nd stage heat sink for outstanding cold water performance
 Outstanding performance and value

HIGH PERFORMANCE REGULATORS

Best matched with the
ZX Octopus 320-1110

50-D

350-2110 Yoke, 350-2121 DIN
4 port low pressure swivel for optimal hose positioning
Dry-sealed 1st stage for extreme conditions
Fully balanced diaphragm 1st stage with 4 LP and 2 HP Ports
Balanced 2nd stage with diver adjustable venturi control
Diver adjustable inhalation effort
2nd stage heat sink for cold water performance
Outstanding performance and value
ANU Certified (approved for US Navy use)

Best matched with the
Envoy Octopus 320-3110

ENVOY

350-3110 Yoke, 350-3121 DIN
Fully balanced diaphragm 1st stage with 5 LP and 2 HP Ports
Balanced 2nd stage with Venturi Control
Outstanding performance and value
Upgradeable to Deluxe or DS-V models

LIGHTWEIGHT COMPACT REGULATORS

Best matched with the
Envoy Octopus 320-3110

ENVOY ReZort

350-5210 Yoke, 350-5220 DIN
A simple reliable workhorse for extended use
Our most economical regulator
with balanced 2nd stage

ENVOY RaZor

350-6240
Compact Valve/ 1st stage combination regulator
Balanced Envoy 2nd stage
Ideal for stage and bailout systems
Includes fill adaptor #330-FA10-AA
Transfiller #330-6050 sold separately

TRANSFILLER YOKE

330-6050
Fills RaZor regulator from scuba cylinder
yoke valves. Can also be used to fill
paintball cylinders.

FILL ADAPTOR

330-FA10-AA
Fills Razor regulator
with air station fill whip

For detailed information on all of our products go to www.zeagle.com.

OCTOPUS

Z OCTOPUS 320-8110

Top performing 2nd stage
Balanced 2nd stage with diver adjustable venturi control
Diver adjustable inhalation effort
Ultra efficient heat sink for extreme conditions
Lightweight low profile design
36" hi flow Miflex hose

ZX OCTOPUS 320-1110

Outstanding 2nd stage
Balanced 2nd stage with diver adjustable venturi control
Diver adjustable inhalation effort
Heat sink for extreme conditions
36" hose

CW OCTOPUS 320-5010

Outstanding 2nd stage
Balanced 2nd stage with diver adjustable venturi control
Heat sink for extreme conditions
36" hose

ENVOY OCTOPUS 320-3110

Top selling octopus and upgradable to CW model
Balanced 2nd stage with diver adjustable venturi control
36" hose

OCTO-Z 320-7200BK Black, 320-7200YL Yellow

Combination BC inflator and air source
Superior performance
Includes Bx oral inflator

Oral Inflator

REGULATOR ACCESSORIES

2ND STAGE SWIVEL ELBOW

340-1003 converts any octopus for left or right hand use

OCTO-Z TO STANDARD INFLATOR ADAPTOR

112-9027-AA Allows use of power inflator with Octo-Z hose

ISOLATOR VALVE

330-0233 Provides shutoff valve for 2nd stage regulator

REGULATOR RELIEF VALVE

330-4905 For use with isolator valve, screws into 1st stage LP port

DIN TO YOKE ADAPTER

330-0001 Adapts a DIN regulator to a yoke style valve

For detailed information on all of our products go to www.zeagle.com.

ZEAGLE

N2ITION 2 DIVE COMPUTER

370-9001

Monitors up to 2 different gas mixtures including nitrogen and oxygen
 3 user adjustable safety factor levels
 Underwater gas switching with the push of a button
 Date, time and water temperature display
 Current and max depth display
 Dive time elapsed and no-decompression time remaining display
 Desaturation and time-to-fly information display
 Back lighting with 5 second LCD visible in all light conditions
 Adjusts automatically for altitude up to 19,685 ft. (6,000 meters)
 Imperial and Metric units of measure
 2 year warranty

N2ITION 3 DIVE COMPUTER

370-9003

The same great features as the N2iTiON, plus:

Monitors up to 3 different gas mixtures including nitrogen and oxygen
 Dot Matrix LCD Displays dive profile in graphic format. It also allows you to enter your own customized messages to display on the top part of the screen - 8 characters on 2 rows.

Deep Stop feature allows for safety stop at greater depth.

Digital Compass integrated with dot matrix display.

Same outer case as the original N2iTiON Dive Computer, allowing it to fit into the existing Wrist Mount, and the new Console.

N2ITION ACCESS CONSOLE

371-9416 Two gauge analog console

371-9416C Three gauge analog console

371-9418 Two gauge N2ition 2 console

371-9418C Three gauge N2ition 2 console

371-9419 Two gauge N2ition 3 console

Ergonomic design

Easy to remove/install computer for downloading or travel

(Also available in Metric)

ANALOG INSTRUMENTS

SLIMLINE CO-PILOT 3 GAUGE CONSOLE

371-9705, Analog pressure, depth, and compass
(also available in metric)

SLIMLINE BRASS PRESSURE GAUGE

371-9411 with 11" hose
371-9432 with 32" hose (also available in metric)

COMPACT PONY SPG

331-PG01-AA screws directly into HP port

DIVE COMPUTER ACCESSORIES

N2ITION SCREEN PROTECTOR 370-9006

Clips over the face of the computer protecting the screen from getting scratched or nicked. The screen protector allows for a small space between the computer face and the screen protector, which facilitates adequate rinsing.

N2ITION PC DOWNLOAD KIT 370-9009

Used to download dives to a PC running Windows XP, 2000, 98 SE, or Vista. It includes the docking station and USB data cable

WRIST MOUNT W/ BUNGEEES 370-9008

BC ACCESSORIES

20 CU. FT. PONY SYSTEM

750-6220
With RaZor regulator
Envoy 2nd stage with 36" hose
Includes Fill Adaptor
Cylinder color is Black or Sanded finish

6 CU FT. QUICK DEPLOY PONY SYSTEM

750-6206
With RaZor regulator
Envoy 2nd stage with 36" hose
Quick deploy Pouch
Includes Transfiller

ZEAGLE

**RAPID DIVER**

710-1062T

Compact, self contained diving system with 20CF-tank, 25 lb. lift air cell, RaZor regulator, SPG, fill adapter.

The unique features of the Rapid-Diver® make it particularly suitable for quick easy donning. Used by military and agency divers worldwide. Its light weight makes it a perfect choice for dives that require a long walk or wade to the dive site, such as seasonal lobster or oyster dives. Divers who are unable to wear or bear the weight of conventional scuba gear will appreciate the comfort and light weight of the Rapid-Diver. The Rapid-Diver features a unique shoulder load-bearing harness that distributes the weight of the system evenly over the user's torso. The Rapid-Diver's small size makes it easy to stow and use on a small boat or kayak.

Other Rapid-Diver® configurations and options available. Go to www.zeagle.com to view options and accessories. Responder Bag 8059BK for Rapid Diver® system is shown below.

THERMAL GEAR

Zeagle's Pinnacle brand covers an extensive line of wetsuits, drysuits, gloves, boots, undergarments, lycra suits, rash guards, equipment bags and other accessories for keeping divers comfortable in all conditions.

The patented Merino fabric lining system is found only in the Pinnacle brand of diving suits and undergarments. The Merino lining material allows the body heat to warm the water and then makes it extremely difficult for the warm water to escape.

Elastiprene is also an exclusive Pinnacle wetsuit material with unbelievable stretch but with minimal compression, thereby keeping the diver warm and comfortable.

Zeagle's Pinnacle line includes many innovative features, attention to detail, state of the art designs, and a sizing range unmatched in the industry.

For more information on Zeagle's Pinnacle line, contact your Pinnacle dealer or go to www.Zeagle.com

Word of Caution Scuba Diving is an adventure activity. It is also inherently dangerous. Even if you do everything right some risks are involved. Obtain adequate training and follow the recommendations of recognized certification agencies. Always follow manufacturer's recommendations as to the maintenance of gear and dive well within your abilities.

Zeagle Systems, Inc. believes the specifications in this brochure to be correct at the time of printing. However, specifications and options are subject to change without notice. Note: some of the products shown have optional features that are supplied at an extra charge. Due to the manufacturing processes of materials used, some fabric colors are more sensitive to sunlight and treated water and may have a greater tendency towards fading. When possible, keep your equipment from direct sunlight and rinse thoroughly with fresh water after each use.
